

Environment and Sustainability Policy

Our Vision

To be recognised as an industry leader in carbon emission reduction and environmental sustainability

Energy Logistix (ELX) is committed to the environmental protection and reducing our environmental footprint across all business activities.

Accordingly, all business activities will be planned and conducted in a sustainable manner in order to minimise, and where possible, avoid adverse impacts on the natural environment and social surroundings for the benefit of current and future generations.

ELX understands its environmental aspects and impacts and has developed and implemented an environmental management system that meets legislative environmental obligations and is aligned to the requirements of ISO 14001, Environmental Management Systems. ELX is committed to:

- Making all reasonable efforts to operate in an environmentally sustainable manner by reducing carbon emissions, preventing pollution, reducing waste and the use of energy and natural resources
- Identifying, promoting and striving for best practice in environmental management systems and operations
- Providing an environmentally sound workplace where efficiencies in the use of resources including energy, chemicals, water, packaging and other materials is continually sought.
- Reducing, re-using and recycling materials wherever practicable
- Establishing a clear environmental strategy and objectives where performance is measured and understood against both lead and lag indicators to drive continual improvement.
- Compliance with Environmental Protection legislation
- Providing the workforce with information, training and awareness to understand their roles and responsibilities with regard to environmental protection
- Engage and encourage workers to be involved at home and volunteering in community activities with a focus on environmental improvement
- Work collaboratively with our customers, suppliers and governments to improve environmental performance and business sustainability
